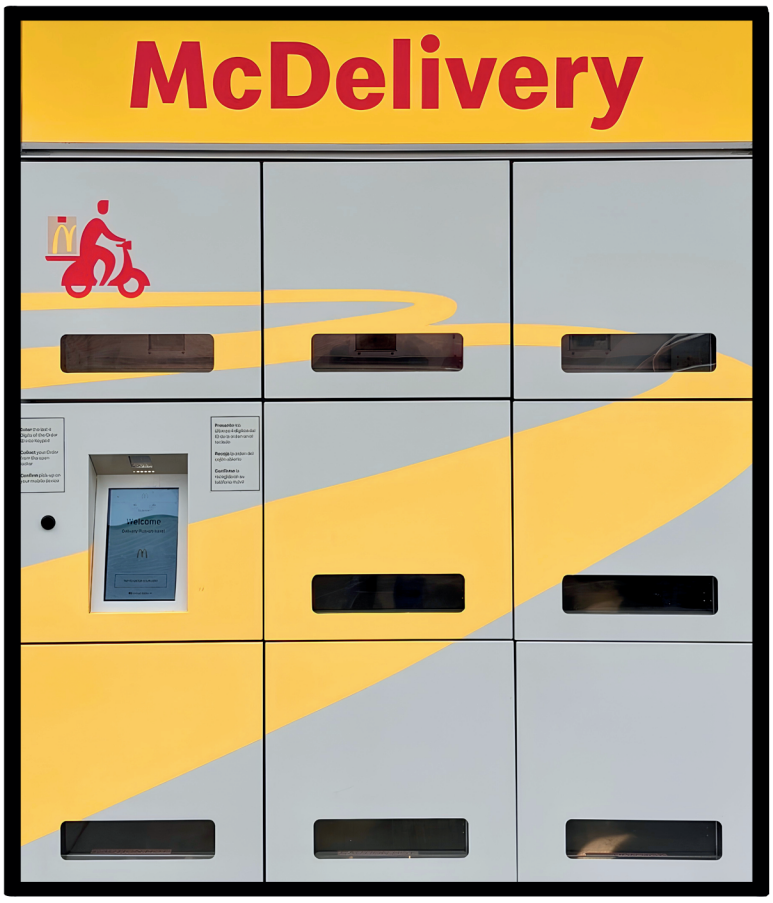
McDonald's®
PICK-UP CABINET SOLUTION

CARTER-HOFFMANN

- **AUTOMATED ORDER PICKUP**
- **GUIDED INTERFACE & UNIQUE ACCESS CODES**
- **INTELLIGENT LOCKER MANAGEMENT**
- **ORDER VERIFICATION AND SECURITY**
- **SEAMLESS FLOW FROM KITCHEN TO COURIER**
- **FAST, CONFIDENT RETRIEVAL**

PUC, by Carter-Hoffmann, offers a secure, efficient, and elevated pickup experience, protecting product integrity and reflecting the premium standards of your brand.



KITCHEN-SIDE WORKFLOW

1. **Assemble & Seal Order**
   Crew member prepares items, packs them securely, and applies the official tamper-evident McDelivery seal.
2. **Scan or Input Order ID**
   Crew member manually inputs the last 4 digits of the Order ID.

   PUC SYSTEM AUTOMATION
   Instantly processes the security credentials, matches the order size, and opens an optimal available locker door.
3. **Secure Order & Reset**
   Food bag is placed inside the designated locker and the door is pushed closed.

   PUC SYSTEM AUTOMATION
   Sensors verify locker occupancy, change state to "Ready," and instantly broadcast status to delivery aggregators.

COURIER-SIDE WORKFLOW

1. **Authenticate Handoff**
   Upon arrival at the pickup station, the courier approaches the screen and keys in the 4-digit Order ID.

   PUC SYSTEM AUTOMATION
   Instantly matches the order, coordinates order accountability, and triggers the target locker door to auto-open.
2. **Pick & Go**
   Courier removes thermal-preserved order from the open door, pushes cabinet door closed, and marks it as picked up.
3. **Instant Cabinet Refresh**
   Courier leaves immediately for delivery with zero counter congestion or communication handoff delays.

   PUC SYSTEM AUTOMATION
   The secure locker compartment resets data logs, marks the order as "Complete," and makes the locker slot reusable.

External Heated Cabinets Featuring BLUE SPARQ ClimateCUE™ **Technology**

Internal Ambient Cabinets

Both Styles Featuring Expandable Modular Design Options
